Meeting 11/2/21 Notes

Team Members Attended:
John Cooke
Zion Emmond
Alex Stiner

Sponsors Attended:
Zac Clifton
Jason Gallavin

Discussed current work on the project and assigned new work listed below.

- Zion is researching Hangfire, a package used to implement recurring jobs and background tasks

    - Starting on the implementation, figuring out how to get it to connect properly and what are the necessary features to implement.

    - Working on implementing Hangfire using MariaDB as opposed to SQL Server

- Zion implemented some requested changes to the frontend and backend sections of the 503 page and associated maintenance table and the PR's were merged.

- John reviewed the code he had worked on for the user panel module.

- Alex reviewed the code for the System-Message component

    - continued testing

    - add process to handle dismissing of messages to local storage

- Alex is assigned to complete the frontend and continue testing the System Messages component.

- Backend is completed and pushed to dev for system message's part.

    - Also assigned to work on creating a link and page to notify users to verify their email addresses or they cannot use certain features in CSLabs.

    - Complete the frontend for system-message with dismissed message handling.

- John is assigned to continue fixing Sonarcloud code smells, find a solution for disabling unwanted rules within Sonarcloud, and continue implementing the CI/CD pipeline

Work Hours Charged:

John: 4 hours
Zion: 4 hours
Alex: 4 hours
